

Hanoi, March 19th, 2003

To Whom It May Concern,

The Mekong Project Development Facility (MPDF) relocated its Hanoi office from existing premises shared with the World Bank Hanoi to new independent premises on the third floor of 63 Ly Thai To Street, Hanoi in May & June 2002.

As Prime Construction had successfully carried out the original fitout for the World Bank, it was selected again to fit out our new MPDF office. This time, Prime used the same specialists and workers as they did for the World Bank Hanoi office before and the work was carried out efficiently and at high standard. We are very satisfied that the fitout was completed smoothly and well followed the planned progress.

We would highly recommend Prime Construction to any potential Client.

Yours sincerely,

PHAN PHUONG HIEN
Administration Officer
